UX Research Report

Insights on fitness app for busy office
employees

RECIPIENT

Ramesh Kumar

PRESENTER

JEEVITHA S

User Persona

A closer look at Ramesh Kumar's lifestyle and needs

- Name & Age: Ramesh Kumar, 29
- Role: Senior Software Engineer (Desk Job)
- Quote: "Want to stay fit, but back-to-back meetings leave me with zero time."
- Goals: 15-min quick workouts + reduce sitting-related back pain.
- Frustrations: Long gym commutes in heavy traffic + desk fatigue.

User Empathy Map Insights

SAYS

- "I will definitely start my fitness routine from this Monday!"
- "I just don't have enough time or energy for a gym."

DOES

- Snoozes the morning alarm repeatedly at 6:00 AM.
- Sits straight for 4-5 hours without any breaks.
- Searches for "quick weight loss tips" online.

THINKS

- "I am getting unhealthy and losing my body shape."
- "Waking up early for gym feels impossible with this burnout."
- "I feel extremely guilty for neglecting my fitness."

FEELS

- Guilty about skipping exercise consecutive days.
- Overwhelmed by long, complicated workout routines.
- Anxious about long-term back pain from desk job.

UX Research Insights & Recommendations

Integrating fitness into a busy lifestyle is essential for improving overall well-being. Our fitness app focuses on micro-workouts that seamlessly fit into short breaks during work hours. Designed with busy professionals like Ramesh in mind, the app offers smart notifications to gently remind users to take breaks and hydrate. Additionally, the gamification aspect encourages consistency without the pressure of traditional fitness metrics. This approach not only helps in managing stress but also promotes a healthier work-life balance. With these features, we aim to transform the perception of fitness from an overwhelming task to an achievable goal, making it easier for our users to incorporate wellness into their daily routines.

THANK YOU
